

#### Today's Topics

- · Syllabus & Objectives
- Textbook
- Assignments
- · Class Policy
- Reminder from "Logic Design" & "CSL"
- Introduction to Computer Architecture

Sharif University of Technology, Spring 2021

#### Course Introduction

- · Instructor: Hossein Asadi
- · Classes
  - Sat. & Mon.: 15:00~16:30
  - Attend class on time
    - · Starts at 15:00 and usually ends by 16:10
  - https://vc.sharif.edu/ch/asadi
  - Be prepared to turn on your camera and your microphone

arif University of Technology, Spring 2021

#### Course Introduction (cont.)

- Office Hours
  - I am usually online and can be reached at
  - Skype account: hossein\_asadi • Sat. through Wed.: 8AM ~ 8PM
  - Room # 610
- TA Classes
  - Mondays: 12:15PM ~ 1:15PM

### Course Introduction (cont.)

- · Course Webpage on CW
  - Check this webpage on regular basis
    - · At least on Sun, Tue, Thur
    - · Q&A only using CW forums
  - Everything will be posted on CW
    - Announcements, handouts, assignments, grades, quiz and exam notices, simulators, ...
  - Handouts
    - · Will be posted a day before class - Print it & bring it to class
  - · But I may update it a day after class Lecture I Check out submission date of handouts

#### Teaching Assistants

- · Comments, Suggestions, & Objections
  - Mahdi Moradi (TA Chair)
- · RTL & Performance & Micro-Architecture Design & Quartus
  - Sina Ahmadi (Head TA)
  - Fereshteh Forghani, Elaheh Khodaei, Ahmad Salimi, Soroush Taslimi, Matina Mahdizadeh

Sharif University of Technology, Spring 2021

#### Teaching Assistants (cont.)

- Cache Memory, SimpleScalar, Arithmetic Floating-Point, IO Handshaking
  - Amirhossein Moradi (Head TA)
  - Elham Adibi, Sajjad Shahabi, Amir Mahdi Namjoo, Seper Pourghannad, Mahsa Amani

Sharif University of Technology, Spring 2021

#### Few Notes on Assignments

- · Post All your Questions on CW Forums
  - Check forum history before posting any question
- · Be Respectful to your Classmates and
- Harsh Cheating Penalty

#### Course Introduction (cont.)

- · Course Webpage
  - Sharif CW webpage, http://cw.sharif.edu
  - Make sure to have an account on CW
  - Check this webpage on regular basis
    - · At least on Sun, Tue, Thur
  - Everything will be posted online
    - · Announcements, assignments, and toolsets
  - Handouts (in pdfs)
    - · Print it & bring it to class
  - Check out submission date of handouts e1 Sharif University of Technology, Spring 2021

#### Course Introduction (cont.)

- Textbook
  - Computer Organization & Design, The Hardware/Software Interface, 4th Edition, by D. Patterson and J. Hennessey, MK publishing, 2012.

Sharif University of Technology, Spring 2021

## Syllabus

- Review
  - Combinational & sequential logic design
  - Design abstractions
  - Computer/CPU history
  - Computer organization
  - Addressing modes
  - Instruction Set Architecture (ISA)
- Number Representation
  - Fixed-point
  - IEEE 754 Floating-point standard · Single precision and double precision

Sharif University of Technology, Spring 2021

#### Syllabus (cont.)

- · Performance Evaluation
  - Performance
  - Important factors in performance
  - Benchmarks
- · Data-Path and Control-Path Design
  - Register Transfer Logic (RTL)
  - Data-path components
  - Control unit design and hardwired controller
  - MIPS data-path
  - Interrupt and I/O polling

Lecture 1

Sharif University of Technology, Spring 2021

#### Syllabus (cont.)

- Micro-Programmed Controller
  - Pros & cons compared to hardwired
- · Multi-Cycle Architecture
- Introduction to Pipeline Architecture
- I/O Approaches
  - I/O handshaking
- Introduction to Multi-Core Systems
- Introduction to Parallel Computing

Lecture 1

Sharif University of Technology, Spring 2021

#### \_\_\_\_\_

#### Syllabus (cont.)

- · Memory System
  - Types of memory
  - Memory hierarchy
  - Cache memory and cache configurations
- Arithmetic Algorithms
  - Addition, subtraction, multiplication, division
  - Arithmetic architectures
- ROC

Booth and array multiplication

Lecture 1

Sharif University of Technology, Spring 2021

#### Objective

- · Understand Basic Architecture of CPUs
- Be Able to Evaluate and Analyze Performance of Different Processors
  - Using simulation tools
- Understand Arithmetic Algorithms
- Understand Memory Hierarchy
  - And its impact on overall performance
- Understand Basics of Pipelining and Multi-Cores Systems

Lecture 1

Sharif University of Technology, Spring 2021

#### Objective (cont.)

- By the end of semester, you should be able to answer these questions:
  - What is functionality of main components of a processor?
  - Why standard benchmarks used for performance evaluation?
  - What are pros and cons of single-cycle, multi-cycle, and pipelined data-paths?
  - Difference between micro-programmed controller and hardwired controller?

Sharif University of Technology, Spring 2021

•

#### Objective (cont.)

- By the end of semester, you should be able to answer these questions:
  - Tradeoffs of small vs. large L1 caches?
  - How many levels in a cache hierarchy?
  - What are pros and cons of directmapped, set-associative, and fullyassociative cache configurations?
  - What are pros and cons of different adder implementations (RC, CSA, CLA)?
    - Ripple-carry, carry-select, carry look-ahead adder

Lecture 1

Sharif University of Technology, Spring 2021

18

#### Grading

- · Midterm Exam: 25%
  - Farvardin 30th
- Final Exam: 30% (date posted in EDU)
- · Quiz (1&2): 15%
  - First quiz: Esfand 25th
  - Second quiz: Ordibehesht 27th
  - Up to three additional unscheduled quizzes
- · Assignments & Project: 30%
  - Bonus points for outstanding projects

Exams: Topics of this Class and TA Classes Sharif University of Technology, Spring 2021

#### Class Policy

- · Ask Questions Anytime
  - Don't hesitate to ask even stupid questions!!!
- · Cell Phones Off or on Silent
- Absence
  - Only three sessions allowed
- Food No. Drink yes!
- Feel Free to Pass Me Your Feedbacks
  - Anything related to this course

Sharif University of Technology, Spring 2021

#### Assignments

- 10~12 Assignments
  - 5~6 analytical assignments
  - 5~6 design & simulation assignments
    - · Altera (Intel) Quartus toolset @
    - SimpleScalar toolset ©
  - Spend enough time on assignments as they will be covered in midterm and final exams

arif University of Technology, Spring 2021

#### Assignments (cont.)

- Assignment Policy
  - Two late assignments will be accepted!
    - · Only two days late!
    - Third late assignment (two-day late)
      - HW will be graded out of 50%
    - · Forth and next late assignments will not be accepted!
  - Discussions encouraged!
  - But do your own handwriting!
  - Zero score for copied assignments!

Sharif University of Technology, Spring 2021

· Second time zero score for 30% share!

#### What You Learned So Far

- · Logic Design
  - Simple logical & arithmetic logic design
    - Addition and subtraction units
    - · Multiplexer and tri-state buffer
    - · Latch and flip-flop
    - · Sequential logic, registers, shifters, counters
- · Computer Structure & Language
  - Computer organization
  - Instruction Set Architecture (ISA)
  - Assembly programming
- Now "Computer Architecture"
- What is "Computer Architecture"?

#### Reminder: Computer Systems

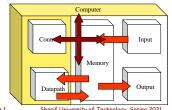

- · A computer system consists of hardware and software that are combined to provide a tool to solve problems (with best performance)
  - Hardware may include:
    - · CPU, memory, disks, printers, screen, keyboard, mouse, .
  - Software may include:
    - System software
      - A general environment to create specific applications
    - Application software

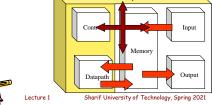

- A tool to solve a specific problem
Lecture 1 Sharif University of Technology, Spring 2021

#### Reminder: Computer Organization

- · Computer Components
  - Input, output, memory, control unit, & datapath

#### Reminder: ISA

- Instruction Set Architecture (ISA)
  - A set of instructions used by a machine to run programs
  - Interface between hardware & software
  - Provides an abstraction of hardware implementation
    - · Hardware implementation decides what and how instructions are implemented
  - ISA specifies
    - · Instructions, Registers, Memory access, Input/output

Sharif University of Technology, Spring 2021

#### Reminder: ISA (cont.)

- Key ISA Decisions
  - Instruction length?
  - How many registers?
  - Where operands reside?
    - · Which instructions can access memory?
  - Instruction format?
  - Operand format?
    - · How many? How big?

Sharif University of Technology, Spring 2021

#### Reminder: ISA (cont.)

· ISA Classes

Code sequence for C = A + B

<u>Stack</u> Accumulator Register-Memory Push A Load A Load R1,A Add C, A, B Push B Add Load R2,B R3,R1,F Add Store C Pop Store C,R3 Sharif University of Technology, Spring 2021

- Addressing Modes
  - Immediate addressing
  - Register addressing
  - Base or displacement addressing
  - PC-relative addressing
  - Pseudo-direct addressing
  - Register indirect
  - Direct
  - Memory indirect
  - Scaled
  - Auto-increment / Auto-decrement
  - Indexed

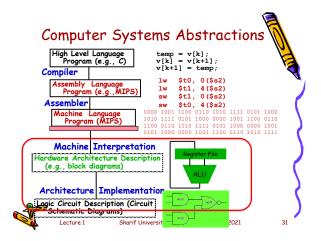

Sharif University of Technology, Spring 2021

#### Computer Systems **Abstractions**

Sharif University of Technology, Spring 2021

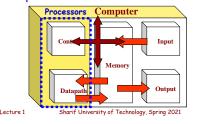

- Definition from Wiki
  - A way a given ISA is implemented on a processor
- · ISA
  - Can be implemented with different uArch
  - Why different implementation?
  - Different goals (performance, power, cost, ...)
- Computer Architecture?
  - ISA + uArch

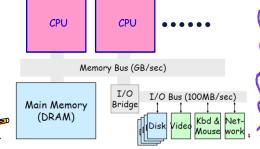

Sharif University of Technology, Spring 2021

## Computer Organization

- · Computer Components
  - Input, output, memory, control unit, & datapath

#### Computer Organization · Computer Components

- · Data Transfer Instructions
  - CPU ⇔ Memory
  - CPU ⇔ I/O
- · Arithmetic & Logical Instructions
- · Control Instruction
  - Conditional branch
  - Unconditional branch

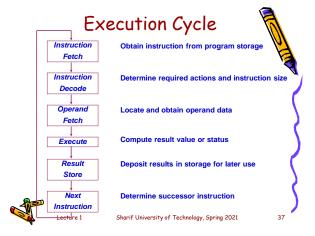

Sharif University of Technology, Spring 2021

#### Reminder: Von-Neumann Model

- Stored Program
  - Instructions stored in a linear memory array
- Sequential Instruction Processing
  - 1. Program counter identifies current instruction
  - 2. Instructions fetched one by one from memory
  - 3. Once fetched, instruction is executed
  - 4. Results stored in memory
  - 5. Program counter incremented
  - 6. Return to step 1

Sharif University of Technology, Spring 2021

#### Micro-Architecture

- · BIG Picture
  - Basic blocks
    - Components need to execute Von-Neumann algorithm

acture 1

Sharif University of Technology, Spring 2021

echnology Spring 20

#### Micro-Architecture

- · Basic Blocks of a Micro-Architecture
  - A high-speed unit to keep code & data
    - · CPU runs very fast but memory is slow
    - · Cache memory (instruction & data cache)
  - A unit to fetch instructions from cache
    - Instruction fetch unit (IFU)
    - · Instructions transferred from I-cache to IFU
  - A unit to decode instructions after fetch process
    - · Instruction decoder unit

Lecture 1

Sharif University of Technology, Spring 2021

#### Micro-Architecture (cont.)

- · Basic Blocks of a Micro-Architecture
  - A unit to execute instructions
    - · Execution unit
  - A unit to do arithmetic/logical operations
    - · ALU
  - A unit to execute branch instruction
    - · Branch unit
  - A unit to execute load/store instructions
    - · Load/store unit
    - · LSU ⇔ D-cache

Lecture 1

Sharif University of Technology, Spring 2021

40

#### Micro-Architecture (cont.)

- · Basic Blocks of a Micro-Architecture
  - A unit to save temporary results within processor
    - · Register file
  - A unit to locate next instruction
    - · Program counter
  - A unit to schedule all data movements
    - · Control unit

Lecture 1

Sharif University of Technology, Spring 2021
